

Message from Prisma Health Equipped for Life:

We as an organization have made it our purpose to ensure that our patients have the equipment necessary to achieve health independence. In doing so, we must make it a priority to have complete, accurate, and timely Certificates of Medical Necessity (CMN).

Equipped for Life is our internal Durable Medical Equipment (DME) company that supplies equipment to our patients across the Upstate and into the Midlands. We quickly provide services to the patient as ordered, but are unable to bill until we receive an acceptable CMN with required supporting documentation. We need your help to ensure we can successfully provide these high quality services to our patients. Collectively, we currently have 1,912 CMNs awaiting completion from our physician group.

We appreciate your continued support of Equipped for Life and look forward to working collaboratively to operate at the highest standards set forth by Prisma Health. Equipped for Life Phone Number: (864-522-3500)
