Prisma Health brings NeuroDirect Telemedicine to AnMed Health

Prisma Health has expanded its [NeuroDirect Telemedicine services](#) to include AnMed Health Medical Center as a partnering hospital. When a patient is admitted to a partnering hospital with emergent stroke symptoms, a protocol is activated that puts a neurologist from Prisma Health Greenville Memorial Hospital in charge. The neurologist examines the patient interactively by webcam, reviews the patient’s CT scan and blood work, and determines whether the patient is eligible for tissue plasminogen activator (tPA), a powerful clot-dissolving medication, or possibly endovascular treatment of the stroke. The process saves valuable time otherwise lost in hospital transfer and providing patients with access to valuable stroke expertise that would otherwise not be available.
